

Software to Improve Healthcare Efficiency

DATA SHEET

# Virtualized NetDelivery Solution from Interbit Data

## REDUCE COSTS AND SIMPLIFY MANAGEMENT WITH A COMPLETELY VIRTUALIZED INFORMATION DISTRIBUTION SOLUTION

Healthcare providers require the ability to retrieve patient information and reports in a highly secure environment. NetDelivery report distribution solutions from Interbit Data enables hospitals and providers to simply and securely send patient information generated from your Healthcare Information System (HCIS). This information can be sent in the format most beneficial to the end users, including fax, print stream, encrypted file, or e-mail.

Now NetDelivery is available in a completely virtualized solution (including fax modems) that complies with HIPAA requirements for patient data security. Virtualization of information distribution is a powerful solution that allows you to both reduce costs and simplify management – two critical goals for healthcare organizations that are dealing with increasing patient loads and government regulations.

## Interbit Data's Mission

Interbit Data helps healthcare organizations deliver better, more consistent patient care with secure, reliable and cost-effective software solutions that improve operational efficiency. Implemented in more than 750 healthcare facilities, Interbit Data solutions help organizations meet the challenging operational demands of the healthcare industry.

## VIRTUALIZED NETDELIVERY REDUCES COSTS

Virtualizing NetDelivery increases server utilization, reduces software and hardware costs, and gives you a smaller data center footprint without sacrificing scalability.

With virtualized fax servers, you can run workstations and servers that have different operating systems on the same fax server at the same time. Thus, fewer fax servers are needed to get the same fax capacity, saving you money on hardware.

NetDelivery's virtualized report delivery servers reduce your costs even more by giving you efficient, flexible, high-volume report delivery without having to implement or maintain physical servers. This delivers big savings on infrastructure and energy costs, and allows you to maintain a smaller data center footprint.

## VIRTUALIZED NETDELIVERY SIMPLIFIES MANAGEMENT

For healthcare organizations to deliver patient reports to clinicians within and outside of your facility, the NetDelivery virtualized solution provides simplified deployment that enables centralized management of resources. Virtualization also allows for better management of fax server resources and reduces points of breakage, resulting in a more reliable and simpler-to-manage solution.

## BENEFITS AT-A-GLANCE

- Consolidates your network to lower total equipment, maintenance, and operating costs
- Reduces long-distance costs and eliminates the need to maintain fax ports on your PBX system
- Provides simplified and centralized management of fax resources and simplifies fax server deployment
- Increases server utilization, delivering a smaller data center footprint with no reduction in scalability
- Leverages virtualization to provide business continuity and to simplify disaster recovery
- Supports software-enabled Fax-Over-IP and virtualization without an existing Voice-Over-IP network
- Complies with HIPAA requirements for securing and transmitting patient information

## ABOUT INTERBIT DATA, INC.

Founded in 1997 and named three years in a row to the Inc. 5000 list of America's fastest-growing companies, Interbit Data helps healthcare organizations deliver better, more consistent patient care with secure, reliable and cost-effective software solutions that improve operational efficiency. The company's information distribution products deliver information securely over the Internet in multiple formats, such as fax, print, email, encrypted file or HL7 message format, and integrate it easily into physicians' practice EMRs. Interbit Data's business continuance products give healthcare providers continuous access to patient data in the event of a network or system outage. Interbit Data products are used by more than 750 customers worldwide. For more information about Interbit Data and its NetSolutions products, visit the company Website at [www.interbitdata.com](http://www.interbitdata.com).
