Distribution Wizard

Secure, Accurate Delivery of Patient Information

Healthcare providers require the ability to retrieve confidential patient information and distribute reports while ensuring the information remains confidential and secure. The **NetDelivery report distribution solutions** enable hospitals and providers to simply and securely deliver reports generated from your MEDITECH® system to those who need the information. Your users get the information they need in the format that makes it easy for them to do their jobs, helping increase the efficiency of your organization.

User Controlled Report Delivery

The **NetDelivery Distribution Wizard** option allows you to collate and direct reports generated by the MEDITECH system to the intended recipients based on user-defined rules using data extracted from the reports. The Distribution Wizard is fully integrated with NetDelivery and the MEDITECH faxing routines in both the MEDITECH Magic and client/server systems.

Features and Benefits

The **NetDelivery Distribution Wizard** option offers additional features and benefits that ensure efficiency and security:

– Reports printed in batches can be collated based on user-defined rules to save your staff time from determining which reports go to which person.

– Recipients, destinations, and file names can be extracted from reports to increase the accuracy of who gets what report, and improve security and efficiency by sending information to the right person on time.

– Documents can be delivered via fax, email, and/or secure remote print due to its integration with NetDelivery to increase customer satisfaction.

– One copy of the report can be sent to multiple recipients to improve system efficiency.

NetDelivery/Distribution Wizard

"NetDelivery with Distribution Wizard has become an invaluable tool for Cape Cod Healthcare. It efficiently captures lab results and department reports, and sends them to the provider's EMR systems as PDF files. In the rare occasion that we are faced with a technical problem, Interbit Data is always readily available for technical support, and efficiently resolves the issue."

*Peter Lavigne
Manager of Clinical Information Systems
Cape Cod Healthcare*

Securing Healthcare Connections

"Without the Interbit Data products, we wouldn't be as responsive as we need to be in this demanding industry."

*Russell Dick
Director of IT
Huron Perth Healthcare Alliance*

Creative Products, Flexible Vendor

"Interbit Data has been a very flexible vendor. They are always open to new ideas and have been able to apply their software and/or develop enhancements to meet all of our needs for automated, reliable faxing from MEDITECH. Their products' open architecture allows us to integrate and interact with technologies such as email, integration engines, etc."

*Avril Cardoso
Manager of Application Services
Information Systems
Credit Valley Hospital*

– Outbound queues can be centrally managed to improve the management of your communications.

– User aliases can be defined to ensure reports are correctly sent to the recipient.

– Documents can be delivered via network printer, fax, folders, or email to streamline delivery to both local and remote users.

Product Information

– Integrates fully with NetDelivery and runs on the NetDelivery server.

– Extracts recipient names from the reports, via user-defined rules, to ensure accurate delivery.

– Feeds recipient information from MEDITECH MIS (single or multiple) using automatic update routine.

– Collates (parses) reports via user-defined rules.

– Allows for unlimited number of user-defined reports and/or rules.

– Ensures correct delivery through use of user alias table.

– Eliminates duplicate copies to same location through group entries.

– Creates an audit trail through comprehensive logging.

– Implements an improved user management interface.

– Integrates with Windows Domain Security.

– Provides the ability to suppress reports or redirect to patient, rather than to provider location.

– Extracts user-defined file names to identify files for distribution.

– Enables administrator to monitor and correct delivery errors through report queues.

About Interbit Data, Inc.

Founded in 1997 and named to the 2009 Inc. 5000 list of America's fastest growing companies, Interbit Data helps healthcare organizations deliver better, more consistent patient care with secure, reliable and cost-effective software solutions that improve operational efficiency. The company's information distribution products deliver information securely over the Internet in multiple formats, such as fax, print, email, encrypted file or HL7 message format, and integrate easily into physicians' practice EMRs. Interbit Data's business continuance products give healthcare providers continuous access to patient data in the event of a network or system outage. Interbit Data products are used by more than 650 MEDITECH® customers worldwide.
