Interbit Data and Park Place International Announce New Partnership Agreement

Interbit Data to provide Report Distribution and Business Continuance solutions to Park Place International for its HCIS integration activities

Natick, MA – May 22, 2013 – Interbit Data, a leading provider of software and services connecting people with information for more efficient healthcare, and Park Place International, a provider of cloud-based and on-premise technology solutions for MEDITECH and the healthcare enterprise, today announced they have extended and solidified their existing partnership agreement.

Under the terms of this partnership, Park Place International will offer Interbit Data solutions to meet the needs of those organizations implementing a MEDITECH Healthcare Information System (HCIS). Park Place will introduce Interbit Data's disaster recovery and business continuance software solutions to customers when the need for these solutions is identified.

"The combination of Interbit Data's technology and Park Place International's expertise will result in customers getting a combination of products that help ensure that their MEDITECH HCIS operates at maximum performance, reliability and efficiency," said Arthur Young, president of Interbit Data. "With this agreement, we can provide customers with a powerful, complete solution that addresses all their information distribution and availability needs and issues."

"Working together, our companies have successfully provided report distribution solutions to MEDITECH hospitals," said James Fitzgerald, Executive Vice President of Park Place International. "The opportunity to partner in delivering additional solutions to our mutual customers to help them achieve operational sustainability is the main reason we have decided to strengthen and extend our relationship."

About Interbit Data

Founded in 1997 and named three years in a row to the Inc. 5000 list of America's fastest-growing companies, Interbit Data helps healthcare organizations deliver better, more consistent patient care with secure, reliable and cost-effective software solutions that improve operational efficiency. The company's information distribution products deliver information securely over the Internet in multiple formats, such as fax, print, email, encrypted file or HL7 message format, and integrate it easily into physicians' practice EMRs. Interbit Data's business continuance products give healthcare providers continuous access to patient data in the event of a network or system outage. Interbit Data products are used by more than 750 customers worldwide. For more information about Interbit Data and its products, visit the company Website at www.interbitdata.com.
